

# PLASTIC DESIGN<sup>INC</sup>

Specializing in plastic fabrication & plastic components

## COVID-19 SPECIAL EQUIPMENT

### *PORTABLE PROVIDER PROTECTION*

Made from acrylic, the product features a balanced design allowing for freedom of movement, while providing maximum shielding for the healthcare professional.

**PART# PRO IB1**

## PERSONAL PROTECTIVE EQUIPMENT

Face shields to provide protection from direct exposure to body fluids. Made from lightweight polycarbonate, the curved design allows for a full range of vision, while providing maximum protection.

## PORTABLE PROVIDER PROTECTION

Small structures which can be easily moved to support patient procedures such as intubation. Made from acrylic, the product features a balanced design allowing for freedom of movement, while providing maximum shielding for the healthcare professional.

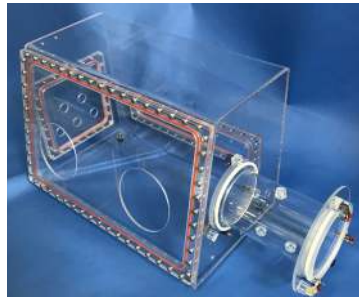

## FIXED PROTECTION SYSTEM

Larger structures designed to protect personnel in higher traffic areas. Made of polycarbonate and incorporating a built-in glove box design, the booth eliminates the requirement for donning personnel protective equipment for routine screenings.

## FAST TRACK PROTOTYPES

Tell us your requirement and we will fabricate it quickly for you. We offer full design and fabrication capabilities. Simple or complex, prototype to large production runs, we can satisfy your specific manufacturing requirements.

## WHY PLASTIC DESIGN?

With more than 40 years of custom plastic fabrication experience, the engineers at Plastic Design will provide the highest level of quality, efficiency, and cost effectiveness. Our 30,000-square-foot fabrication facility is ISO9001:2015 certified to ensure your quality standards are met in the most efficient manner possible.
